Powerful Tools for Instruction, Communication and Assessment

Course Management - Addresses activities involving managing the course site or major components of the course site. Course Management capabilities focus on effective creation and set-up of courses (Course Creation Wizard, Course Templates) as well as tools for semester-to-semester migration (Course Copy, Course Recycle) and archiving (Course Import/Export, Course Archive, Course Backup).

Content Authoring - The Visual Text Box Editor provides a rich text editing interface, including WYSIWYG (What You See Is What You Get) and Spell Check, to create effective learning content. QuickEdit allows an instructor to quickly switch between the student view of a course content area and the instructor view. Instructors can also import e-learning content created in external authoring tools such as Macromedia® Dreamweaver®, Microsoft® Frontpage®, or any SCORM-compliant authoring tool.

Adaptive Release - Provides the ability for an instructor to create custom learning paths through course content and activities. Content items, discussions, assessments, assignments, or other activities can be released to students based on a set of criteria

The screenshot shows a web browser window displaying the Blackboard Academic Suite interface. The browser's address bar shows the URL: http://courseites.blackboard.com/webapps/portal/frameset.jsp?tab=courses&url=/bin/common/course.pl?course_id=115. The page title is "Blackboard Academic Suite - Mozilla Firefox". The main content area is titled "ANNOUNCEMENTS" and shows a date range of "August 27, 2005 - September 03, 2005". Below this, it states "No announcements found." and includes a "Terms of Use" link. On the left side, there is a vertical menu with buttons for "Announcements", "Course Documents", "Assignments", "Communication", "Discussion Board", "External Links", and "Tools". Below this menu is a "Tools" section with icons for "Communication", "Course Tools", "Course Map", "Control Panel", "Refresh", and "Detail View".
